CIVIL ENGINEERS
with interest in several engineering areas:

Structures
Transportation
Geotechnical
Materials

Gain valuable experience for your career.
Work on exciting research projects.
Get paid while earning your Master’s degree.

The Midwest Roadside Safety Facility (MwRSF), located on UNL’s city campus, specializes in the design, analysis, and crash testing of roadside safety hardware, including bridge rails, steel guardrail, and concrete barriers. Learn valuable skills that will be tailored to your interests, including: dynamic analysis of vehicular impacts with structures; structural analysis & design; finite element analysis; and many other areas. We are looking for talented Graduate Research Assistants to work on exciting research projects while completing graduate coursework. Must be admitted to or applying to graduate school at UNL. Minimum GPA required.

Previous graduate students have careers at:
- Black and Veatch
- Kiewit Power Engineers
- Concrete Industries, Inc.
- Caterpillar
- John Deere
- Research universities
- HDR
- Cessna
- Union Pacific
- JEO Consulting
