Tracks to the Future

Railroad Transportation and Engineering Program June 18 - 20, 2025

Railroads are a high-tech and environmentally friendly mode of transportation! Stay on campus at the University of Nebraska-Lincoln and discover why railroads are still the most energy-efficient way to move goods and people. Students will interact with university faculty, connect with rail industry professionals, learn about railroad engineering, and explore career options within the railroad industry.

Open to incoming high school freshman and recent graduates!

Activities Include:

- Railroad Model Track Building
- Rail Operations
- Intermodal Transportation Competition
- Trainz Simulation
- Railroad Facility Tour
