Tracks to the Future

**Railroad Transportation and Engineering Program
June 24-26, 2026**

Railroads are a high-tech and environmentally friendly mode of transportation! Stay on campus at the University of Nebraska-Lincoln and discover why railroads are still the most energy-efficient way to move goods and people. Students will interact with university faculty, connect with rail industry professionals, learn about railroad engineering, and explore career options within the railroad industry.

Open to all high school students from incoming freshman to recent graduates!

Activities Include:

- Railroad Model Track Building
- Rail Operations
- Panel discussion with railroad and civil engineers across private and public sectors
- Hands-on activities with railroad engineers
